

CYBERSECURITY

QUANTIFY YOUR CYBER RISK

THE RISK CHALLENGE

Organizations often lack clarity concerning cyber risk and need a comprehensive measurement that accounts for all potential sources of exposure beyond just those that are technical. This limited understanding can lead to mismanagement of internal risk, as well as an inadequately-informed investment in cyber insurance that results in higher than desired premiums.

GUARD STREET'S SOLUTION

Though Guard Street's strategic partner, we offer the most comprehensive cyber risk quantification solution that establishes the foundation for your company to make data-driven and financially vetted determinations regarding how much risk to remediate, retain or transfer through a cyber risk insurance policy.

GETTING RESULTS THROUGH OUR SOLUTION

We collect data from your organization, use a robust model to compute your cyber risk – your M-ScoreSM – and communicate the most highly influential factors over your score. We enable continuous monitoring and reporting so that your leadership team can prioritize various cyber risk management initiatives.

- Situational Factors
- Organizational Factors
- Industry Factors
- Application Vulnerability
- Infrastructure Vulnerability
- Governance Standards

Bad 0-200	Poor 200-400	Fair 400-600	Good 600-800	Excellent 800-1000
<p>You are having trouble measuring, managing and mitigating cybersecurity threats. Companies in this range often purchase cyber technologies they don't need or worst, they lose money in a cybersecurity breach.</p>			<p>Often found in enterprises like banks and insurance companies.</p>	<p>You are in the same category as federal agencies like the D.O.D.</p>

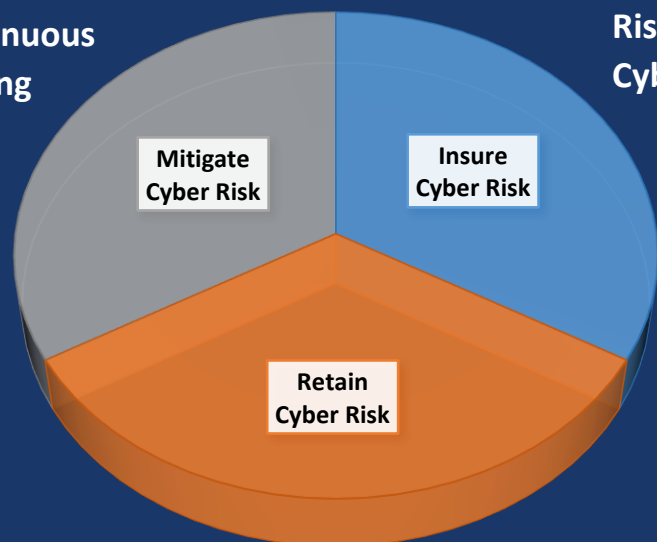

CYBER INSURANCE ADVISORY SERVICES

We define cyber risk within the organization in financial terms, ultimately leading them to make confident, calculated decisions when it comes to cyber risk insurance spend.

We help organizations understand and navigate exclusions in their current policy and we help organizations lower insurance premiums using the M-Score report and findings.

Continuous Scoring

Risk Based Cyber policy

Warranty

CREATING AND MAINTAINING RISK AWARENESS IN YOUR ORGANIZATION WITH CONTINUOUS MONITORING AND DASHBOARD

We provide informational tools such as the Policy Documentation Library and the “Breach What-if” calculator to improve your organization’s risk posture with good policies and offer factual foundations for budget creation and prioritization

The data collected is always available and allows you to create reports for audits, RFPs and due diligence responses.

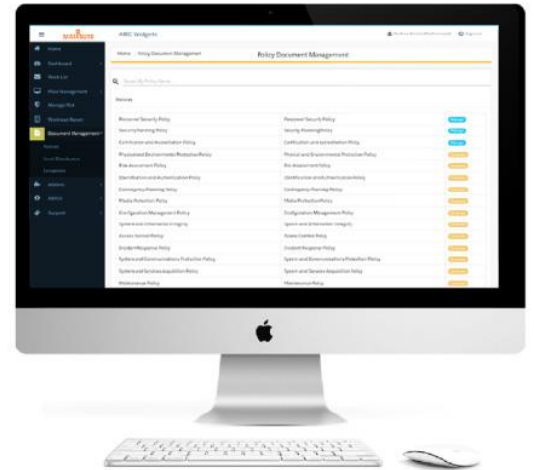

ABOUT GUARD STREET PARTNERS

Guard Street is dedicated to assisting our clients with information security risk management, quantifying the cybersecurity need, risk mitigation, monitoring your digital brand, fraud management and vulnerability detection and prevention.

Our services minimize unwanted exposure and protect against external threats by detecting data loss, securing your online brand and reducing your attack surface. Organizations can suffer regulatory fines, loss of intellectual property and reputational damage when digital risk is left unmanaged.

Our experts also specialize in:

- Computer Security Assessments
- Online Brand Security
- Compliance Audits
- Penetration Tests
- Computer Forensic Investigations
- Security Awareness Training
