CYBERSECURITY

DEFEND YOUR BUSINESS WITH CYBER ATTACK PROTECTION

Specifically designed to address the #1 concern of business owners: "How will I prevent and survive a cyber-attack?"

67% of cyber-attacks affected companies with less than 100 people.

$200,000 is the average cost per cyber-attack.

As much as 60% of small businesses close within 6 months of a data breach.

You can prevent AND survive a cyber-attack.
It's easy, affordable and effective.

Security Incident Response
Access to cybersecurity specialists through our hotline at a savings.

$100,000 of SMB Focused Cybersecurity Insurance
Get financial security in case of a catastrophic event.

HOW IT WORKS

Cyber-Attack Prevention Process

Vulnerability Scan   +   **Alerts**   +   **Remediation**   =   **Business Protection**

Your monthly external scan will identify your network vulnerabilities and keep up with the latest threats.

Your alerts appear on an emailed report and in your portal.

You receive non-technical explanations on how to fix or you can have us remediate.

Cyber-Attack Recovery Process

Cyber-Attack   +   **Call Hotline**   +   **Cyber Insurance**   =   **Business Protection**

Member calls security incident response hotline.

Access to cyber liability insurance.

HOW DO I ENROLL AND USE?

1. Provide your company's key information needed and pay for service. Information includes: Business Legal Name, Email Address, Phone Number, IP addresses, URLs and point of contact.

2. Scanning Runs Automatically

3. Follow Alerts and Remediate

4. Call us if you need help with vulnerabilities or if there is an attack
