

DEFEND YOUR BUSINESS WITH REMOTE WORKFORCE CYBERSECURITY

Specifically designed to prevent remote workforce cyber threats and to recover from a cyber-attack.

95% of cyber-attacks start with email.

\$200,000 is the average cost per cyber-attack.

As much as 60%
of small businesses close within 6 months of a data breach.

You can prevent AND survive a cyber-attack.

It's easy, affordable and effective.
